

HOME OXYGEN SAFETY

Ensure your home has working smoke detectors that are checked regularly

Ensure your home has a working fire extinguisher and house hold members have training to use it.

No one should smoke in your home.

Stay away from heat sources (candles, prick lights, electrical appliances, fireplaces.)

Do not use flammable products like hair spray, other aerosol sprays, rubbing alcohol, paint thinner; or petroleum-based products such as lip-balm, lotions, oils etc while oxygen is in use.

Ensure you get fire safety education, or attend fire safety course, and have a fire safety plan.

Place the oxygen concentrator in a well-ventilated area free of smoke and away from direct sunlight; ensure that the air intake and exhaust ports are not obstructed.
